

# why frogz?

**frogz** strategy is defined as way to overthrow the superior competition in the marketing field by engaging in one enormous, determined, ruthless & brilliant leap of mastermind that results in extraordinary growth, profit and controlling position.

**frogz** jump one leaf to another & from one tree to other in order to catch their preys fast & accurate. and this is our concept, we take brands from it's current position higher level of success.

#### who we are?

- -we are strategic thinkers.
- -we evaluate business and projects, research your competitors, establish ways to reach new demographics or engage with existing.
- -we help launch new business or brands.
- -we listen carefully to your ideas and goals and expound on them.

- we come up with even more unique ideas.
- we are more than just experienced marketers, designers, content writers and developers.

at frogz, we have the team, the know-how and experience that are essential for creating endless of possibilities for your business growth.

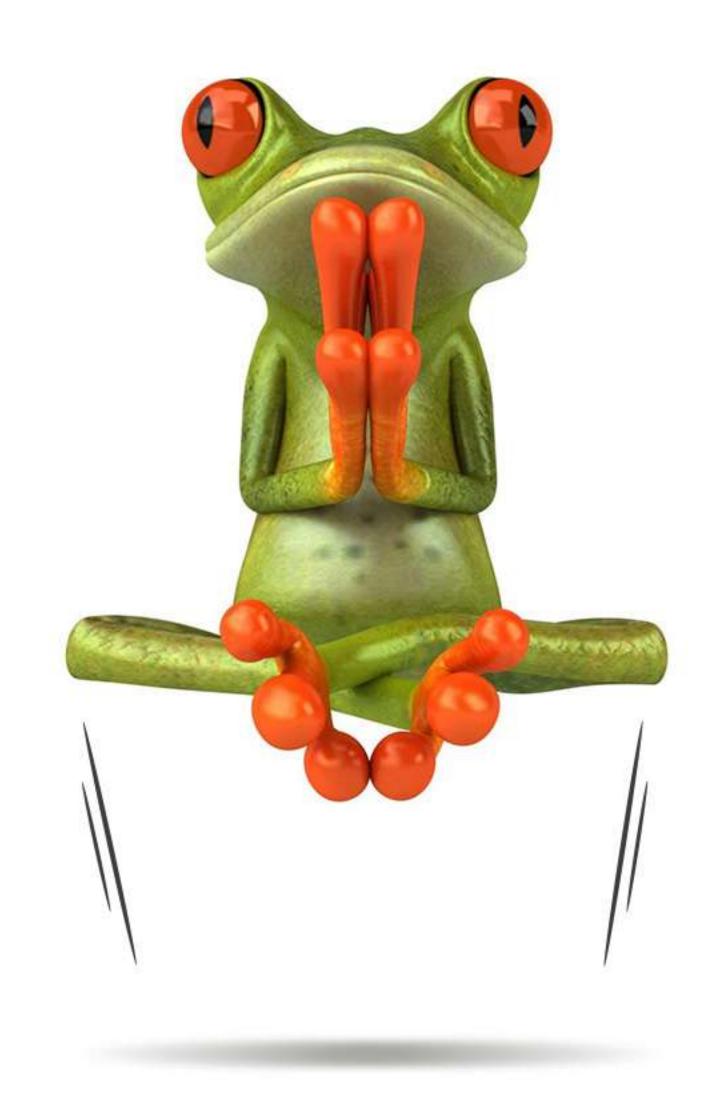

ultimately, we are your partner.

#### what we do?

frogz is a full service agency who works with their clients as partners by providing them all the advertising mediums needed.

our core is to focus on developing and delivering winning results that drive our clients business. we aren't like most traditional agencies, we are result and quality service driven, and what sets up apart is our complete on results wheather you're just starting out or evolving your brand; **frogz will help you grow.**

#### Wooridul Spine Centre

Wooridul Spine Centre (WSC) is a pioneer centre for spine surgeries, which was established in 1982 in Busan, Korea.

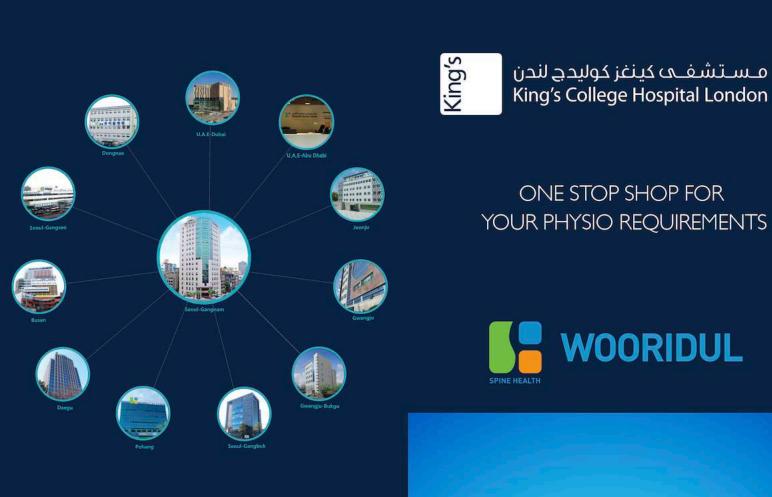

It has 10 branches in Korea and has extended its service to the Middle East since 2011.

WSC is a world leader in spearheading minimally invasive treatment techniques.

Our surgeons are internationally renowned for their minimally invasive spine surgery techniques and their high rate of patient satisfaction. WSC provides comprehensive treatment plans for patients with spinal disorders. The team provides services for most spine conditions from diagnostic to therapeutic procedures.

We also have a state-of-the-art physiotherapy department, which is a cornerstone of managing spine diseases.

#### 6 Major Treatment

- Manual Therapy
- Neurac Sling
- Centaur Training
- Decompression Treatment (traction)
- Pain Management
- Post operation Rehabilitation

#### I. Manual Therapy

Manual Therapy - Skilled hand movements intended to produce any or all of the following effects: improve tissue extensibility; increase range of motion of the joint complex; mobilize or manipulate soft tissues and joints; induce relaxation; change muscle function; modulate pain; and reduce soft tissue swelling, inflammation or movement restriction.

#### 2. Neurac Sling

Restore pain-free movement patterns and improve function. Neurac treatment challenges the interplay between muscles and focuses on what is causing the problem – not only on the symptoms.

#### 3. Centaur Training

The computer-supported test and training device (CTT) that trains the autochthonic back musculature directly through a precisely reproducible application of strain.

#### 4. Decompression Treatment (traction)

Traction Therapy - Based on combining motion with traction which simultaneously decrease pressure, enables fluid exchange, improves Range of Motion (ROM) and promotes recovery.

#### 5. Pain management

#### **RSWT**

The treatment of indications with radial, pneumaticallygenerated, low-energy acoustic waves, or 'pressure pulses'. The applied pressure pulse propagates radially within the tissue, generating a therapeutic effect.

#### Cryotherapy

The efficient pain treatment and swelling reduction, as well as relaxation of muscle tone. The high power output enables a quick decrease of the superficial skin temperature thus provides the desired treatment effects.

#### Winback 3S

This non-invasive current stimulates the body's natural repair mechanisms, promoting cellular exchange. In combination with the therapist's manual approach, it offers excellent rehabilitation results thanks to fast recovery of muscle and joint functions.

#### Electrotherapy

Applies electrical stimulation in treating muscle spasms and pain. It can help prevent atrophy and build strength in patients with injuries. It is also helpful in keeping muscles active especially after any type spinal cord injury.

#### Soft tissue mobilization

manual techniques to affect muscles and other soft tissues. It is used to relax muscles, promote healing and breakdown scar tissue.

#### Post operation Rehabilitation

#### Corrective exercise program

the systematic performance or execution of planned physical movements or activities intended to enable the patient or client to remediate or prevent impairments of body functions and structures, enhance activities and participation, reduce risk, optimize overall health, and enhance fitness and well-being.

#### Printing Samples

#### **PROTECT**

YOURSELF AND OTHERS AGAINST

#### COVID 19

\_\_\_

Cover your coughs or sneezes with tissues or your elbow.

Put your uses tissues in the rubbish bin or in a plastic bag.

Wash and dry your hands often, especially after coughing or sneezing - usesoap or hand sanitise.

Stay away from others if you are unwell.
